DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2, 12, 20-22, & 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Spaulding et al (US 6269184).

Re claims 1-2, 16, 20-22, & 25, Spaulding et al discloses (Abstract; column 3, lines 39-65; column 5, line 14 - column 7, line 31) an arrangement for determining a transformation of colorant values from a first to a second colorant space such that the transformation is modified on the basis of stored information pertaining to the particular set of colorant values used in the first colorant space.

Allowable Subject Matter

3. Claims 3-15, 24, & 27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 16-19 are allowed.

5. The following is a statement of reasons for the indication of allowable subject matter:

Re claim 3, (and dependent claims 4-6 & 9) the art of record does not teach or suggest the recited first and second transformations having the recited relationship to an arrangement for determining a transformation of colorant values from a first to a second colorant space such that the transformation is modified on the basis of the particular set of colorant values used in the first colorant space.

Re claims 7-8, 24 & 27 (and dependent claims 11, 13, & 15), the art of record does not teach or suggest the selection of a psychovisual or psychophysical quantity in conjunction with the recited arrangement for determining a transformation of colorant values from a first to a second colorant space such that the transformation is modified on the basis of the particular set of colorant values used in the first colorant space.

Re claims 10 & 16 (and dependent claims 14 & 17-19), the art of record does not teach or suggest the recited separation of a specific color in the first colorant space in conjunction with the recited arrangement for determining a transformation of colorant values from a first to a second colorant space such

that the transformation is modified on the basis of the particular set of colorant values used in the first colorant space.
